

End-Of-Life announcement for software products SI-Config, SI-Boot, SI-Print, SI-Personal

SPORTident is working on the improvement of its software applications. To achieve this we want the user to be in the need of only a one single application that can handle all standard preparation and maintenance processes of SPORTident hardware.

Since a few weeks, the new software **SPORTident Config+** is available to our customers worldwide. This application is going to become the superior of our commonly known software products. Therefore, we hereby declare the **End-Of-Life** status for the following listed applications and their current versions:

- **SI-Config** (Station maintenance, SI-Card readout) Version 2.8.6
 - supports **BSx7/8** until **FW623**, **BS11** until **FW320**,
 - supports **SI-Card 5,6,8,9,10,11**, **SIAC** until **SW 3.4**
- **SI-Print** (Printerstation layout management) Version 2.0.2
 - supports **BS7-P** until **FW623**
- **SI-Boot** (Station firmware update) Version 2.20
 - supports **BSx7/8** until **FW623**, **BS11** until **FW320**
- **SI-Personal** (SI-Card personalization) Version 2.2.1
 - supports **BSx7/8** until **FW623**, **BS11** until **FW320**
 - supports **SI-Card 5,6,8,9,10,11**, **SIAC** until **SW 3.4**

SPORTident will discontinue the development of these software products beginning from June, 1st 2015. This also includes bug fixes and modifications to support new operating systems (like Windows 10). The latest versions will still be available for download on our website.

SPORTident will still provide support for the listed product versions until the End-Of-Support status is declared. This date is not determined yet.

Be aware that SPORTident Config+ is supported on Windows operating systems starting with Windows XP SP3 and later. Windows 2000 will no longer be supported.
